Contents

Preface ................................................................. v
Contributors ......................................................... xi

PART I  ACTIVATION AND FUNCTION OF COMPONENTS OF THE
MAP KINASE SIGNALING CASCADES

1 The MAP Kinase Signaling Cascades: A System of Hundreds
of Components Regulates a Diverse Array of Physiological Functions ........ 3
   Yonat Keshet and Rony Seger

2 Determination of ERK Activity: Anti-phospho-ERK Antibodies
   and In Vitro Phosphorylation ........................................ 39
   Shiri Procaccia, Sarah Kraus, and Rony Seger

3 Activation of SAPK/JNKs In Vitro .................................... 59
   Deborah N. Chadee and John M. Kyriakis

4 Activation of p38 and Determination of Its Activity ....................... 75
   Huamin Zhou, Jianming Chen, and Jiabuai Han

5 Activity Assays for Extracellular Signal-Regulated Kinase 5 ................. 91
   Kazubiro Nakamura and Gary L. Johnson

6 Use of Inhibitors in the Study of MAP Kinases ........................... 107
   Kimberly Burkhard and Paul Shapiro

PART II  STUDY OF MAP KINASE CASCADES AS TRANSMITTERS
OF MEMBRANAL RECEPTOR SIGNALS

7 MAP Kinase Activation by Receptor Tyrosine Kinases:
   In Control of Cell Migration ........................................ 125
   Gabi Tarcic and Yosef Yarden

8 Activation of Ras and Rho GTPases and MAP Kinases
   by G-Protein-Coupled Receptors ..................................... 137
   Mario Chiariello, Jose P. Vaqué, Piero Crespo, and J. Silvio Gutkind

9 Regulation of MAP Kinase Signaling by Calcium .......................... 151
   Colin D. White and David B. Sacks

10 Identification of Novel Substrates of MAP Kinase Cascades
    Using Bioengineered Kinases that Uniquely Utilize Analogs
    of ATP to Phosphorylate Substrates ............................... 167
    Hui Zheng, Adnan Al-Ayoubi, and Scott T. Eblen

11 ERK-MAP Kinase Signaling in the Cytoplasm ............................. 185
    Michelle C. Mendoza, Ekrem Emrah Er, and John Blenis
12 Lentiviral Vectors to Study the Differential Function of ERK1 and ERK2 MAP Kinases .................................................. 205
   Marzia Indrigo, Alessandro Papale, Daniel Orellana, and Riccardo Brambilla

PART III STRUCUTURE-FUNCTION RELATIONSHIPS AND LOCALIZATION OF MAP KINASES

13 Structural Studies of MAP Kinase Cascade Components ........................................... 223
   Elizabeth J. Goldsmith, Xiaoshan Min, Haixia He, and Tianjun Zhou
14 Analysis of MAP Kinases by Hydrogen Exchange Mass Spectrometry ....................... 239
   Kevin M. Sours and Natalie G. Abn
15 A “Molecular Evolution” Approach for Isolation of Intrinsically Active (MEK-Independent) MAP Kinases ..................................... 257
   Vered Levin-Salomon, Oded Livnah, and David Engelberg
16 Reconstitution of the Nuclear Transport of the MAP Kinase ERK2 ............................ 273
   Arif Jivan, Aarati Ranganathan, and Melanie H. Cobb
17 Localization and Trafficking of Fluorescently Tagged ERK1 and ERK2 ........................ 287
   Matilde Marchi, Riccardo Parra, Mario Costa, and Gian Michele Ratto

PART IV STUDIES ON THE REGULATION OF MAP KINASE CASCADES

18 Studying the Regulation of MAP Kinase by MAP Kinase Phosphatases In Vitro and in Cell Systems ............................................. 305
   Céline Tárrega, Caroline Nunes-Xavier, Rocío Cejudo-Marín, Jorge Martín-Pérez, and Rafael Pulido
19 Proteomic Analysis of Scaffold Proteins in the ERK Cascade ........................................ 323
   Melissa M. McKay and Deborah K. Morrison
20 Analysis of ERKs’ Dimerization by Electrophoresis ........................................... 335
   Adán Pinto and Piero Crespo
21 MAP Kinase: SUMO Pathway Interactions .................................................................. 343
   Shen-Hsi Yang and Andrew D. Sharrocks
22 Computational Modelling of Kinase Signalling Cascades ........................................... 369
   David Gilbert, Monika Heiner, Rainer Breitling, and Richard Orton

PART V USE OF LOWER ORGANISMS, ANIMAL MODELS, AND HUMAN GENETICS IN THE STUDY OF MAP KINASES

23 Analysis of Mitogen-Activated Protein Kinase Activity in Yeast ................................ 387
   Elaine A. Elion and Rupam Saboo
24 Detection of RTK Pathway Activation in Drosophila Using Anti-dpERK Immunofluorescence Staining .............................................. 401
   Aharon Helman and Ze’ev Paroush
25 Studying MAP Kinase Pathways During Early Development of Xenopus laevis .......... 409
   Aviad Keren and Eyal Bengal
26 Deciphering Signaling Pathways In Vivo: The Ras/Raf/Mek/Erk Cascade ................ 421
   Gergana Galabova-Kovacs and Manuela Baccarini
27 Mutational and Functional Analysis in Human Ras/MAP Kinase Genetic Syndromes ................................................................. 433
   William E. Tidyman and Katherine A. Rauen
PART VI STUDY OF MAP KINASES IN SPECIFIC PHYSIOLOGICAL SYSTEMS

28 Implication of the ERK Pathway on the Post-transcriptional Regulation of VEGF mRNA Stability ........................................ 451
Khadija Essafi-Benkhadir, Jacques Pouysségur, and Gilles Pagès

29 Studies on MAP Kinase Signaling in the Immune System ............... 471
Hongbo Chi and Richard A. Flavell

30 Methods to Study MAP Kinase Signalling in the Central Nervous System ...... 481
Bettina Wagner and Maria Sibilia

31 MAP Kinase Regulation of the Mitotic Spindle Checkpoint............... 497
Eva M. Eves and Marsha Rich Rosner

32 Using High-Content Microscopy to Study Gonadotrophin-Releasing Hormone Regulation of ERK ........................................ 507
Christopher J. Caunt, Stephen P. Armstrong, and Craig A. McArdle

Index .......................................................................................... 525
