Preface ....................................................................................................................... v
Contributors ............................................................................................................. ix

PART I  JAK PROTEIN TYROSINE KINASES

1 Analysis of Janus Tyrosine Kinase Phosphorylation and Activation ......................... 3
   Jeremy A. Ross, Georgialina Rodriguez, and Robert A. Kirken

2 Co-immunoprecipitation Protocol to Investigate Cytokine Receptor-Associated Proteins, e.g., Janus Kinases or Other Associated Signaling Proteins ............... 21
   Claude Haan and Serge Haan

3 In Vitro JAK Kinase Activity and Inhibition Assays ................................................... 39
   Jeffrey J. Babon and James M. Murphy

4 Quantitative Analysis of JAK Binding Using Isothermal Titration Calorimetry and Surface Plasmon Resonance ................................................................. 57
   Jeffrey J. Babon

5 Determination of Protein Turnover Rates in the JAK/STAT Pathway Using a Radioactive Pulse-Chase Approach ................................................................. 69
   Anna Dittrich, Elmar Siewert, and Fred Schaper

6 Designing RNAi Screens to Identify JAK/STAT Pathway Components ..................... 81
   Katherine H. Fisher, Stephen Brown, and Martin P. Zeidler

7 The Use of JAK-Specific Inhibitors as Chemical Biology Tools ................................ 99
   Christopher J. Burns, David Segal, and Andrew F. Wilks

8 Methods for Detecting Mutations in the Human JAK2 Gene .................................... 115
   Anthony J. Bench, E. Joanna Baxter, and Anthony R. Green

PART II  SIGNAL TRANSDUCERS AND ACTIVATORS OF TRANSCRIPTION

9 Detection of Activated STAT Proteins ...................................................................... 135
   Jean-Patrick Parisien and Curt M. Horvath

10 Detection of Activated STAT Species Using Electrophoretic Mobility Shift Assay (EMSA) and Potential Pitfalls Arising from the Use of Detergents ................ 147
    Serge Haan and Claude Haan

11 Flow Cytometric Analysis of STAT Phosphorylation .............................................. 161
    Jane Murphy and Gabrielle L. Goldberg

12 Acetylation of Endogenous STAT Proteins ............................................................ 167
    Torsten Ginter, Thorsten Heinzel, and Oliver H. Krämer
13 Detection and Cellular Localization of Phospho-STAT2 in the Central Nervous System by Immunohistochemical Staining. ............................. 179
   Reza Khoroooshi and Trevor Owens

14 Nuclear Trafficking of STAT Proteins Visualized by Live Cell Imaging .......... 189
   Velasco Cimica and Nancy C. Reich

15 Characterization of STAT Self-Association by Analytical Ultracentrifugation .... 203
   Nikola Wenta and Uwe Vinkemeier

16 Constitutively Active STAT5 Constructs ........................................ 225
   Lynn M. Heltemes-Harris and Michael A. Farrar

PART III SUPPRESSOR OF CYTOKINE SignALLING PROTEINS

17 Analysis of Suppressor of Cytokine Signalling (SOCS) Gene Expression by Real-Time Quantitative PCR ........................................ 235
   Tatiana B. Kolesnik and Sandra E. Nicholson

18 Detection of Endogenous SOCS1 and SOCS3 Proteins by Immunoprecipitation and Western Blot Analysis ............................... 249
   Jian-Guo Zhang and Sandra E. Nicholson

19 In Vitro Ubiquitination of Cytokine Signaling Components .................... 261
   Jeffrey J. Babon, Artem Laktyushin, and Nadia J. Kershaw

PART IV STRUCTURAL ANALYSIS OF THE JAK/STAT PATHWAY

20 Production and Crystallization of Recombinant JAK Proteins ..................... 275
   Isabelle S. Lucet and Rebecca Bamert

21 Bacterial Expression, Purification, and Crystallization of Tyrosine Phosphorylated STAT Proteins ........................................ 301
   Florence Baudin and Christoph W. Müller

Index ................................................................. 319
