DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.
Table of Contents

Fundamentals

1 Introduction
1 Periodontal Diseases
4 The Clinical Course of Untreated Periodontitis
4 Periodontitis—Concepts of Therapy

7 Structural Biology
8 Gingiva
10 Epithelial Attachment
12 Connective Tissue Attachment
14 Root Cementum
16 Osseous Support Apparatus
18 Blood Supply of the Periodontium
19 Innervation of the Periodontium
20 The Coordinated Functions of the Periodontal Structures

21 Etiology and Pathogenesis
22 Periodontitis—A Multifactorial Disease

23 Microbiology
24 Biofilm—Plaque Formation on Tooth and Root Surfaces
25 Supragingival Plaque
26 Natural Factors Favoring Plaque Retention
27 Iatrogenic Factors Favoring Plaque Retention
28 Subgingival Plaque
29 Bacterial Invasion Into Tissue?
30 Classification of Oral Microorganisms
31 Cell Walls of Gram-Positive and Gram-Negative Bacteria
32 Periodontitis—Classical or Opportunistic Infection?
33 Putative Periodontopathic Bacteria
34 Virulence Factors
34 Virulence Transfer
36 Marker Bacteria in Periodontitis
37 Pathogenic “Single Fighters” vs. Pathogenic Complexes?
38 Endotoxins—Lipopoly saccharide (LPS)
38 Interaction Between LPS and the Host

39 Pathogenesis—Reactions and Defense Capabilities of the Host
40 New Concepts of Pathogenesis

41 Host Response—Mechanisms and “Participators”
41 Non-specific, Congenital Immunity—the First Line of Defense
43 Specific, Acquired Immunity—the Second Line of Defense
44 Components of the Immune System—Summary
45 Interactions Between Non-specific and Specific Immunity
46 Regulatory Cell Surface Molecules: Markers, Receptors
47 Cytokines
49 Eicosanoids—Prostaglandins and Leukotrienes
50 Enzymatic Mechanisms—Matrix Metalloproteinasen
51 Risk for Periodontitis—the Susceptible Host
52 Genetic Risk Factors—Diseases, Defects, Variations
54 Alterable Risk Factors, Modifying Co-Factors
55 Pathogenesis I—Initial Inflammatory Reactions
56 Pathogenesis II—Histology
58 Pathogenesis III—Molecular Biology
60 Attachment Loss I—Destruction of Connective Tissue
61 Attachment Loss II—Bone Resorption
62 Pathogenesis—Clinical Features: From Gingivitis to Periodontitis
63 Cyclic Course of Periodontitis
64 Periodontal Infections and Systemic Diseases
65 Etiology and Pathogenesis—Summary

67 Indices
70 Papilla Bleeding Index—PBI
71 Periodontal Indices
72 Community Periodontal Index of Treatment Needs—CPITN
73 Periodontal Screening and Recording—PSR

74 Epidemiology
74 Epidemiology of Gingivitis
75 Epidemiology of Periodontitis
76 WHO Studies

Disease Entities and Diagnosis

77 Types of Plaque-associated Periodontal Diseases
77 Gingivitis—Periodontitis
78 Classification of Periodontal Diseases—Nomenclature

79 Gingivitis
80 Histopathology
81 Clinical Symptoms
82 Mild Gingivitis
83 Moderate Gingivitis
84 Severe Gingivitis

85 Ulcerative Gingivitis/Periodontitis
86 Histopathology
87 Clinical Symptoms—Bacteriology
88 Ulcerative Gingivitis (UG)
89 Ulcerative Periodontitis (UP)
90 Ulcerative Gingivoperiodontitis—Therapy

91 Hormonally Modulated Gingivitis
93 Severe Pregnancy Gingivitis—Gingival Eruptions
94 Pregnancy Gingivitis and Phenyltoin

95 Periodontitis
96 Pathobiology—The Most Important Forms of Periodontitis
96 Type II
96 Type III B
97 Type III A
97 Type IV B
98 Pathomorphology—Clinical Degree of Severity
99 Pockets and Loss of Attachment
100 Intra-alveolar Defects, Infra bony Pockets
102 Furation Involvement
104 Histopathology
105 Additional Clinical and Radiographic Symptoms
108 Chronic Periodontitis—Mild to Moderate
110 Chronic Periodontitis—Severe
112 Aggressive Periodontitis—Ethnic Contributions?
114 Aggressive Periodontitis—Acute Phase
116 Aggressive Periodontitis—Initial Stage
118 Prepubertal Periodontitis—PP (Aggressive Periodontitis)

119 Oral Pathologic Alterations of Gingiva and Periodontium*
120 Primarily Gingival Alterations (Type I B)
120 Gingival and Periodontal Alterations (Type IV A/B)
121 Phenyltoin-Induced Gingival Overgrowth
122 Dihydroxypropidine-induced Gingival Overgrowth
123 Cyclosporine-induced Gingival Overgrowth
124 Gingival Hyperplasia Following Combined Drug Therapies
125 Benign Tumors—Epulis
126 Benign Tumors—Fibrosis, Exostosis
127 Malignant Tumors
128 Gingivosis / Pemphigoid
128 Periphysus vulgaris
129 Lichen planus: Reticular and Erosive
130 Leukoplakia, Pre-Cancerous Lesions—Oral Granulomasenes
131 Herpes—Herpetic Gingivostomatitidis
132 Periodontitis with Systemic Diseases (Type IV)—Diabetes Type I and Type II
134 Periodontitis Associated with Systemic Diseases (Type IV B)
135 Down Syndrome, Trisomy 21, “Mongolism”
136 Pre-pubertal Periodontitis Associated with Systemic Disease
138 Papillon-Lefèvre Syndrome (Type IV B)
139 Papillon-Lefèvre Syndrome—“An Exception for Every Rule”

139 HIV Infection—AIDS
140 HIV Disease—Epidemiology
141 Classification and Clinical Course of HIV Disease
142 Oral Manifestations of HIV Disease
143 Bacterial Infections in HIV
144 Fungal Infections
145 Viral Infections
146 Neoplasms
147 HIV-Associated Lesions of Unknown Etiology
148 Invasion and Replication of the HI Virus—Hurdles for Systemic Medical Treatment
149 Treatment of the HIV Patient—Pharmacologic Aspects
150 HIV—Treatment of Opportunistic Infections
150 Infection Prevention and Post-exposure Prevention—The Dental Team
151 Treatment of HIV-Periodontitis

155 Gingival Recession
156 Fenestration and Dehiscence of the Alveolar Bone
157 Clinical Symptoms
158 Recession—Localised
159 Recession—Generalised
Table of Contents

160 Clinical Situations Resembling Recession
161 Recession—Diagnosis
162 Measurement of Recession (Jahnke)
163 Classification of Recession (Miller)
164 Consequences of Recession

165 Data Collection—Diagnosis—Prognosis
166 Data Collection—Examinations
167 General Patient Health History
168 Special Patient Health History
169 Pocket Probing—Probing Depth, Clinical Attachment Loss
170 Pocket Probing—Periodontal Probes
171 Pocket Probing Depths—Interpretation of the Measured Values
172 Fissure Involvement—Horizontal and Vertical Fissure Invasion
174 Tooth Mobility—Functional Analysis
176 Radiography

178 Additional Diagnosis—Tests
180 Microbial Diagnosis—Test Methods
181 Microbial Pocket Diagnosis—Dark Field and Phase Contrast Microscopy
182 New Diagnostic Tests—Evaluation
183 Molecular Biological Tests
184 Bacterial Probe Test—Practical IAI PadoTest
185 DNA/RNA Probe Tests—IAI PadoTest 4·5
186 Immunological Tests—Antigen-Antibody Reactions
187 Enzymatic Bacterial Tests—BANA Test

188 Tests of the Host Response—Risks
189 Genetic Risk—Test for IL-1 Gene Polymorphism
190 I·L 1 Gene Test—Technique, Evaluation
191 Risk Factor IL-1 positive Genotype—Additional Risk Factors
192 Poor Oral Hygiene as a Risk Factor—Bleeding on Probing (BOP)
193 Periodontal Risk Assessment—Individual Risk Profile
194 Diagnostic Data Collection—Periodontal Charting, I and II
195 Computer-Enhanced Charting—the Florida Probe System
196 Diagnosis
197 Prognosis

198 Prevention—Prophylaxis
199 Definition: Prevention—Prophylaxis
199 Prevention of Gingivitis and Periodontitis

Therapy

201 Treatment of Inflammatory Periodontal Diseases
202 Therapeutic Concepts and Techniques
203 Therapy—Problems
204 Periodontitis—Therapeutic Goals, Therapeutic Outcomes

205 Periodontal Wound Healing
206 Wound Healing and Regeneration—Possibilities
208 Treatment Planning—Sequence of Treatment
209 Pre-phase—Systemic Health, Oral Hygiene
210 General Course of Therapy—Individual Planning

211 Systemic Pre-phase
212 Evaluation—Can the Patient be Safely Treated?
213 Bacteremia—Endocarditis Prophylaxis
214 Dental Procedures Carrying the Risk of Bacteremia
215 Diabetes mellitus (DM)—Risk factor for Periodontitis
216 Smoking—An Alterable Risk Factor

217 Emergency Treatment
221 Phase 1 Therapy
222 Case presentation—Motivation—Information

223 Initial Treatment 1—Oral Hygiene by the Patient
224 Motivation—Gingival Bleeding
225 Plaque Dislosing Agents
226 Toothbrushes
227 Toothbrushing Technique
229 The Solo Technique—A Different Way to Brush Your Teeth
230 Electric Toothbrushes
231 Interdental Hygiene
234 Dentifrices
235 Chemical Plaque Control—“Soft Chemo” Prevention
236 Irrigators

237 Oral Hygiene for Halitosis
238 Possibilities, Successes and Limitations of Oral Hygiene

239 Initial Therapy 1—Creating Conditions that Enhance Oral Hygiene
240 Supragingival tooth cleaning—Power-driven Instruments ...
241 … and their Use
242 Supragingival Tooth Cleaning—Hand Instruments, Prophy Paste ...
243 … and their Use
244 Creation of Conditions that Enhance Oral Hygiene—Removal of Iatrogenic Irritants
246 Correction of iatrogenic Irritants—Bridge Pontics
247 Removal of Natural Plaque-retentive Areas—Odontoplasty of Grooves, Depressions, Irregularities
248 Reduction of Natural Plaque-retentive Areas—Crowning: Morphologic Odontoplasty
249 Treatment of Plaque-elicited Gingivitis
252 Gingivitis Treatment

253 Phase 1 Therapy
254 Definitions
255 Non-Surgical, Anti-Infectious Therapy—Goals of Treatment
255 Antimicrobial Therapy—Combating the Reservoir
256 Root Planning—With or without Curettage?
257 Closed Therapy—Indication, Instrumentation
258 Hand Instruments for Scaling and Root Planing—Curettes
259 Powered Instruments for Debridement
260 Gracey Curettes—Areas of Use
262 Hand Instruments for Special Problems—Curettes
263 Practical Scaling Technique with Gracey Curettes—Systematic Approach
264 Instrument Sharpening
265 Manual Sharpening of Hand Instruments
267 Automated Sharpening
271 Subgingival Debridement—Closed Root Cleaning
276 Closed Therapy in Quadrant 1 ...
277 … and in the Rest of the Dentition?
278 Limitations of Closed Therapy
280 Possibilities and Limitations of Closed Therapy ...

281 FMT—“Full Mouth Therapy”
282 FMT—Instrumental/Mechanical and ...
283 … Pharmacologic Therapy
284 FMT—Radiographic Results
285 FMT—Statistical/numerical Results

287 Medication
287 Anti-Infectious Supportive Therapy—Antibiotics in Periodontitis Therapy
288 Decision-Making Criteria—When to Use Antibiotics?
289 Antibiotics—Bacterial Sensitivity and Resistance
289 Systemic Versus Local (Topical) Antimicrobial Therapy
290 Local (Topical) Antimicrobial Therapy—“Controlled Release Drugs” (CRD)
291 Host Response/Reaction—Modulating Substances
295 Phase 2 Therapy
296 Periodontal Surgery—Corrective Phase
297 Purposes and Goals of Periodontal Surgery
297 Patient Selection
298 Factors that Influence the Treatment Result
299 Methods of Periodontal Surgery and their Indications
300 Principles of Various Treatment Modalities—Advantages and Disadvantages
302 Pre-operative Treatment—Post-operative Care

303 Flap Procedures—Open Treatment
304 Flap Design—Incisions
305 Instruments for Flap Surgery
306 Needles and Suture Materials
307 Sutures and Knots
308 Frequently Used Suture Placements

309 “Access Flap” Surgery, Open Flap Debridement (OFD)—Modified Widman Flap (MWF)
310 Principles of the Modified Widman Procedure—Ramford Technique
312 Principles of the MWF—Occlusal View
317 “Access Flap”/Modified Widman Procedure—Case Presentation
318 “Access flap”/Modified Widman Procedure
319 Long-term Results Following Various Treatment Modalities
320 Wedge Excision Distal to a Lone-standing Tooth—Principles
320 Wedge Excision—Most Distal Tooth

323 Regenerative Methods
324 Intra-alveolar Pockets—Anatomy of the Defect
326 Bone Regeneration without “Transplantation”
327 Filling Materials for Intra-Alveolar Pockets—Transplants/Implants
328 Instruments for Harvesting Autogenous Bone ...
329 … and Their Use
330 Implantation (Transplantation?) of Autogenous Bone
332 Bone Replacement Materials—“Fillers”
### Table of Contents

</table>

334 Alloplastic Implant—Combined Surgical Procedure  
337 Combined Procedure—Intra-Osseous Implant  
338 Guided Tissue Regeneration—GTR  
340 Selection of Membranes and Barriers  
341 GTR Using Non-resorbable Membranes  
345 Individual Immediate Membrane—Atrosorb/Attrigel Technology  
348 GTR with Membrane and Filler—“Atrosorb Free Flow,” “Bio-Oss Collagen”  
348 GTR with Filling Material and a Membrane—“Bio-Gide” and “Bio-Oss Collagen”  
351 Regeneration Using Proteins, Growth Factors and Differentiation Factors  
352 Flap Surgery Combined with Enamel Matrix Proteins—Emdogan  
354 Regeneration Using Emdogan  
355 Regenerative Therapy—Quo Vadis?  
356 Resective Methods  
357 Pocket Elimination—Osseous Surgery  
358 Instruments for Osseous Surgery ...  
359 and Their Use  
360 Evaluation of Various Resective Methods  
362 Resective Therapy  
363 Apical Flap Repositioning—Pocket Elimination  
366 Combined Flap Surgical Techniques  
367 Gingivectomy and Gingivoplasty  
368 Instruments for Gingivectomy/Gingivoplasty ...  
369 ... and Their Use  
369 Tissue Dressings and Tissue Adhesives  
371 Gingivectomy/Gingivoplasty  
377 G/V/GP, Maxilla: Facial and Palatal  
378 G/V/GP—Minor Surgical Procedures, Corrective Operations  
379 Exposing the Margins of Restorations and Cavity Preparations  
379 G/V/GP—Phenylquinone-Induced Gingival Overgrowth  
380 Limitations of G/V/GP—Cyclosporine-Induced Gingival Overgrowth  
381 Furaclon Involvement—Furcation Treatment  
382 Embryologic Development of Multi-Rooted Teeth—Furcation  
383 Furcation Involvement—Classifications  
384 Treatment Planning—Problems—Long-Term Results  
385 Furcation Treatment—Aids for Decision Making  
386 Therapeutic Possibilities for Various Cases  
388 Furcation Involvement (F1) in the Mandible—Ontoplasty and Scaling  
389 Furcation Involvement, F2, in the Maxilla—Furcationplasty  
390 Furcation Involvement, F2, in the Mandible—GTR Technique  
392 Furcation Involvement, F3, in the Mandible—Extraction with Extraction  
394 Furcation Involvement, F3, in the Maxilla—Reconstruction  
396 Maxillary Furcation Involvement, F3—Trisection with Maintenance of All Roots  
397 Muco-gingival, Plastic Surgery  
398 Muco-gingival Problems ...  
399 ... and Possibilities for Resolution  
400 Frenotomy—Frenectomy  
401 Free Gingival Graft—Autogenous Transplant—with Epithelium  
411 and Their Use  
402 Instruments for Harvesting the Transplant ...  
403 ... and Their Use  
404 Free Gingival Graft—Thickness and Shape  
405 Free Gingival Graft—Haling Recession  
410 FGG—Wound Healing, Clinically ...  
411 ... and via Fluorescence Angiography  
412 Advantages and Disadvantages of FGG  
413 Covering Areas of Recession  
414 Osteotomy for the Defect—Selection of Surgical Technique  
415 Pedicle Flap Techniques  
416 Direct Coverage with a Free Gingival Graft  
419 Coronally Repositioning after Free Gingival Grafting—2-Stage Surgical Procedure  
420 Covering Areas of Recession with a Connective Tissue Graft  
421 Harvesting Tissue from the Palate  
422 Harvesting the Tissue from the Palate—Schematic and Clinical  
423 Additional Methods for Harvesting Connective Tissue Grafts  
425 Free Connective Tissue Graft—Nelson Technique  
426 Connective Tissue Graft—Nelson Technique  
426 Connective Tissue Graft and Barriers  
430 Connective Tissue Graft ... and Dealing with Complications  
435 Covering Areas of Recession via “Guided Tissue Regeneration”—GTR  
437 Treating Recession After Orthodontic Therapy  
440 Covering Areas of Recession on Several Teeth—Possibilities  
441 Coronally Repositioned Flaps and Papilla Rotation  
442 Esthetic Improvement through Mucogingival Surgery  
444 Summary—Mucogingival, Plastic Surgery  
445 Periodontics—Endodontics  
446 Class I—Primarily Endodontic Problem  
446 Class II—Primarily Periodontal Problem  
447 Class III—Combined Perio-Endo Problems  

Supporting Therapies

459 Function—Functional Therapy  
459 Normal Function  
460 Physiologic Tooth Mobility  
461 Occlusal Periodontal Trauma  
462 Occlusal Bite Guard—The Michigan Split  
463 Orthodontics  
464 Maxillary Anterior Segment Space Closure Following Periodontal Therapy  
466 Uprighting the Mandibular Second Molar  
468 Maxillary Anterior Esthetic Correction Following Periodontitis Treatment  
470 Treatment of the Malpositioned Canine  
471 Splinting—Stabilization  
471 Temporary Splinting  
474 Semi-Permanent Splinting—Anterior Area  
475 Permanent Splinting—Adhesive Technique  
476 Prosthetic Stabilization—Long-Term Temporary  
477 Perio-Prosthetics 1  
479 Standard Techniques  
479 Adhesive Bridge in the Mandible—Long-Term Temporary  
480 Fixed Temporary—Problem Zones  
481 Fixed Acrylic Temporary—Practicality  
482 Fixed, Metal-Reinforced Long-Term Temporary  
483 Inlay Bridge in the Mandible—Total Bridgework  
484 Molar Loss—What Now?  
488 Telescope (“Coping”) Bridgework with Few Remaining Teeth  
488 Cast Framework Prostheses—“Social Solution”  
489 Perio-Prosthetics 2  
489 Supplemental Measures, Esthetics  
489 Goals, Problems and Solutions in Esthetic Perio-Prosthetics  
490 Crown Margins—Bioligic Width—Dentogingival Complex (DGC)  
491 Esthetic Width—Umbrella Effect—Dentogingival Complex (DGC)  
492 Smile Line—Red-White Proportions  
493 Crown Lengthening—Principles  
494 Surgical Crown Lengthening—Step by Step  
496 Papilla Loss—Classification, Rules  
497 Papilla Loss—Prosthetic Rehabilitation with Veneers  
500 Papilla Loss—Prosthetic Treatment Using Crowns  
502 Edentulous Arch Segments—Pontics  
503 Alveolar Ridge Defects—Classifications  
504 Alveolar Ridge Defect—Prosthetic Solution  
505 Alveolar Ridge Defects—Surgical Corrections—Methods  
506 Ridge Augmentation Using Partially Epithelialized Connective Tissue Graft  
509 Ridge Defect—Build-up with Connective Tissue Graft—Summary  
511 Dental Implants—Implant Therapy  
512 Determinative Diagnostic Criteria  
513 Therapeutic Concepts—Therapeutic Results  
514 Recall—Management of Implant Problems

Appendices

515 Geriatric Periodontology?—The Periodontium in the Elderly  
516 Age-Related Changes—Influence Upon Treatment Planning

519 Classification of Periodontal Diseases  
519 New Classification of Periodontal Diseases (1999)  
522 Changes—Comparing the 1989 and 1999 Classifications  
523 Recall—“Personalized Periodontology”

524 Acknowledgments for Figures  
525 References  
528 Index
