Machine Learning: ECML 2003

14th European Conference on Machine Learning, Cavtat-Dubrovnik, Croatia, September 22-26, 2003, Proceedings

Bearbeitet von
Nada Lavrac, Dragan Gamberger, Ljupco Todorovski, Hendrik Blockeel

1. Auflage 2003. Taschenbuch. xvi, 512 S. Paperback
ISBN 978 3 540 20121 2
Format (B x L): 15,5 x 23,5 cm
Gewicht: 789 g

Weitere Fachgebiete > EDV, Informatik > Informatik > Logik, Formale Sprachen, Automaten

schnell und portofrei erhältlich bei

beck-shop.de
Table of Contents

Invited Papers

From Knowledge-Based to Skill-Based Systems: Sailing as a Machine Learning Challenge .............................. 1
  Pieter Adriaans

Two-Eyed Algorithms and Problems .................................. 9
  Leo Breiman

Next Generation Data Mining Tools: Power Laws and Self-similarity for Graphs, Streams and Traditional Data ............................ 10
  Christos Faloutsos

Taking Causality Seriously: Propensity Score Methodology Applied to Estimate the Effects of Marketing Interventions ..................... 16
  Donald B. Rubin

Contributed Papers

Support Vector Machines with Example Dependent Costs .................. 23
  Ulf Brefeld, Peter Geibel, and Fritz Wysotzki

Abalearn: A Risk-Sensitive Approach to Self-play Learning in Abalone ..... 35
  Pedro Campos and Thibault Langlois

Life Cycle Modeling of News Events Using Aging Theory .................. 47
  Chien Chin Chen, Yao-Tsung Chen, Yeali Sun, and Meng Chang Chen

Unambiguous Automata Inference by Means of State-Merging Methods ... 60
  François Coste and Daniel Fredouille

Could Active Perception Aid Navigation of Partially Observable Grid Worlds? .................. 72
  Paul A. Crook and Gillian Hayes

Combined Optimization of Feature Selection and Algorithm Parameters in Machine Learning of Language ............................. 84
  Walter Daelemans, Véronique Hoste, Fien De Meulder, and Bart Naudts

Iteratively Extending Time Horizon Reinforcement Learning ............... 96
  Damien Ernst, Pierre Geurts, and Louis Wehenkel
Volume under the ROC Surface for Multi-class Problems .................. 108  
César Ferri, José Hernández-Orallo, and Miguel Angel Salido

Improving the AUC of Probabilistic Estimation Trees ................... 121  
César Ferri, Peter A. Flach, and José Hernández-Orallo

Scaled CGEM: A Fast Accelerated EM ........................................ 133  
Jörg Fischer and Kristian Kersting

Pairwise Preference Learning and Ranking ............................ 145  
Johannes Fürnkranz and Eyke Hüllermeier

A New Way to Introduce Knowledge into Reinforcement Learning .... 157  
Pascal Garcia

Improvement of the State Merging Rule on Noisy Data  
in Probabilistic Grammatical Inference ................................. 169  
Amaury Habrard, Marc Bernard, and Marc Sébén

COllective INtelligence with Sequences of Actions –  
Coordinating Actions in Multi-agent Systems ..................... 181  
Pieter Jan ’t Hoen and Sander M. Bohte

Rademacher Penalization over Decision Tree Prunings ............... 193  
Matti Kääriäinen and Tapio Elomaa

Learning Rules to Improve a Machine Translation System .......... 205  
David Kauchak and Charles Elkan

Optimising Performance of Competing Search Engines  
in Heterogeneous Web Environments .................................. 217  
Rinat Khoussainov and Nicholas Kushmerick

Robust $k$-DNF Learning via Inductive Belief Merging ............... 229  
Frédéric Koriche and Joël Quinqueton

Logistic Model Trees .......................................................... 241  
Niels Landwehr, Mark Hall, and Eibe Frank

Color Image Segmentation: Kernel Do the Feature Space ........... 253  
Jianguo Lee, Jingdong Wang, and Changshui Zhang

Evaluation of Topographic Clustering and Its Kernelization ........ 265  
Marie-Jeanne Lesot, Florence d’Alché-Buc, and Georges Siolas

A New Pairwise Ensemble Approach for Text Classification ......... 277  
Yan Liu, Jaime Carbonell, and Rong Jin

Self-evaluated Learning Agent in Multiple State Games .......... 289  
Koichi Moriyama and Masayuki Numao
