# Table of Contents

## Invited Papers

Ten Challenges *Redux:*
Recent Progress in Propositional Reasoning and Search .......................... 1
  *Henry Kautz and Bart Selman*

Automated Mechanism Design:
A New Application Area for Search Algorithms ................................. 19
  *Tuomas Sandholm*

Languages versus Packages for Constraint Problem Solving ................. 37
  *Mark Wallace*

Constraint Patterns ................................................................. 53
  *Toby Walsh*

## Best Paper

Control Abstractions for Local Search ........................................ 65
  *Pascal Van Hentenryck and Laurent Michel*

## Full Papers

Improved Algorithms for Counting Solutions in Constraint Satisfaction Problems ................................. 81
  *Ola Angelsmark and Peter Jonsson*

Boosting Chaff’s Performance by Incorporating CSP Heuristics ............ 96
  *Carlos Ansótegui, Jose Larrubia, and Felip Manyà*

Efficient CNF Encoding of Boolean Cardinality Constraints .................. 108
  *Olivier Bailleux and Yacine Boufkhad*

A Two-Stage Hybrid Algorithm for Pickup and Delivery Vehicle Routing Problems with Time Windows ........................................ 123
  *Russell Bent and Pascal Van Hentenryck*

Solving Finite Domain Constraint Hierarchies by Local Consistency and Tree Search ..................................................... 138
  *Stefano Bistarelli, Philippe Codognet, Kin-Chuen Hui, and Jimmy Ho Man Lee*
HIBISCUS: A Constraint Programming Application to Staff Scheduling in Health Care ................................................................. 153
Stéphane Bourdais, Philippe Galinier, and Gilles Pesant

Constraint-Based Optimization with the Minimax Decision Criterion ..... 168
Craig Boutilier, Relu Patrascu, Pascal Poupart, and Dale Schuurmans

An Algebraic Approach to Multi-sorted Constraints .................. 183
Andrei A. Bulatov and Peter Jeavons

Periodic Constraint Satisfaction Problems: Polynomial-Time Algorithms ... 199
Hubie Chen

Box Constraint Collections for Adhoc Constraints ................... 214
Chi Kan Cheng, Jimmy Ho Man Lee, and Peter J. Stuckey

Propagation Redundancy in Redundant Modelling .................... 229
Chiu Wo Choi, Jimmy Ho Man Lee, and Peter J. Stuckey

Soft Constraints: Complexity and Multimorphisms .................. 244
David A. Cohen, Martin Cooper, Peter Jeavons, and Andrei Krokhin

Constraint Satisfaction Differential Problems ....................... 259
Jorge Cruz and Pedro Barahona

A Wealth of SAT Distributions with Planted Assignments ............ 274
Tassos Dimitriou

Redundant Modeling for the QuasiGroup Completion Problem ........ 288
Iván Dotú, Alvaro del Val, and Manuel Cebrián

Open Constraint Optimization ............................................ 303
Boi Faltings and Santiago Macho-Gonzalez

Constraints for Breaking More Row and Column Symmetries ........ 318
Alan M. Frisch, Chris Jefferson, and Ian Miguel

Generic SBDD Using Computational Group Theory .................. 333
Ian P. Gent, Warwick Harvey, Tom Kelsey, and Steve Linton

Using Stochastic Local Search to Solve Quantified Boolean Formulae .... 348
Ian P. Gent, Holger H. Hoos, Andrew G.D. Rowley, and Kevin Smyth

Solving Max-SAT as Weighted CSP ..................................... 363
Simon de Givry, Javier Larrosa, Pedro Meseguer, and Thomas Schiex

Constraint Reasoning over Strings .................................... 377
Keith Golden and Wanlin Pang

Tractability by Approximating Constraint Languages ................ 392
Martin J. Green and David A. Cohen
A Hybrid Constraint Programming
and Semidefinite Programming Approach for the Stable Set Problem .... 407
Willem Jan van Hoeve

A Constraint-Aided Conceptual Design Environment
for Autodesk Inventor ................................................. 422
Alan Holland, Barry O'Callaghan, and Barry O'Sullivan

Fast Bound Consistency for the Global Cardinality Constraint .......... 437
Irit Katriel and Sven Thiel

Propagating N-Ary Rigid-Body Constraints .......................... 452
Ludwig Krippahl and Pedro Barahona

Solving ‘Still Life’ with Soft Constraints and Bucket Elimination .......... 466
Javier Larrosa and Enric Morancho

Exploiting Multidirectionality
in Coarse-Grained Arc Consistency Algorithms .......................... 480
Christophe Lecoutre, Frédéric Boussemart, and Fred Hemery

Local-Search Techniques for Propositional Logic Extended
with Cardinality Constraints ............................................ 495
Lengning Liu and Mirosław Truszczynski

Discrepancy-Based Additive Bounding for the AllDifferent Constraint .... 510
Andrea Lodi, Michela Milano, and Louis-Martin Rousseau

A Synthesis of Constraint Satisfaction and Constraint Solving ............ 525
Michael J. Maher

Maintaining Longest Paths Incrementally .............................. 540
Laurent Michel and Pascal Van Hentenryck

Resolution and Constraint Satisfaction .................................. 555
David G. Mitchell

Generating High Quality Schedules
for a Spacecraft Memory Downlink Problem ............................ 570
Angelo Oddi, Nicola Policella, Amedeo Cesta,
and Gabriella Cortellessa

Symmetry Breaking Using Stabilizers .................................. 585
Jean-François Puget

An Efficient Bounds Consistency Algorithm
for the Global Cardinality Constraint .................................. 600
Claude-Guy Quimper, Peter van Beek, Alejandro López-Ortiz,
Alexander Golynski, and Sayyed Bashir Sadjad
Solving Existentially Quantified Constraints with One Equality and Arbitrarily Many Inequalities .......................... 615
  Stefan Ratschan

Using Constraint Programming to Solve the Maximum Clique Problem ... 634
  Jean-Charles Régin

Greater Efficiency for Conditional Constraint Satisfaction ................. 649
  Mihaela Sabin, Eugene C. Freuder, and Richard J. Wallace

Incremental Computation of Resource-Envelopes in Producer-Consumer Models ............................................. 664
  T.K. Satish Kumar

Approximated Consistency for Knapsack Constraints ...................... 679
  Meinolf Sellmann

Cost-Based Filtering for Shorter Path Constraints .......................... 694
  Meinolf Sellmann

Bounded Backtracking for the Valued Constraint Satisfaction Problems ... 709
  Cyril Terrioux and Philippe Jégou

Consistency and Propagation with Multiset Constraints:
  A Formal Viewpoint .......................................................... 724
  Toby Walsh

Pruning while Sweeping over Task Intervals .................................. 739
  Armin Wolf

Improving Backtrack Search for Solving the TCSP ............................ 754
  Lin Xu and Berthe Y. Choueiry

Certainty Closure:
  A Framework for Reliable Constraint Reasoning with Uncertainty ...... 769
  Neil Yorke-Smith and Carmen Gervet

Poster Papers

clp(pdf(y)): Constraints for Probabilistic Reasoning in Logic Programming ......................................................... 784
  Nicos Angelopoulos

To Be or Not to Be ... a Global Constraint ................................. 789
  Christian Bessière and Pascal Van Hentenryck

Constraint Programming for Modelling and Solving Modal Satisfiability ... 795
  Sebastian Brand, Rosella Gennari, and Maarten de Rijke

Distributed Forward Checking .................................................. 801
  Ismel Brito and Pedro Meseguer

Constraints over Ontologies ......................................................... 878
  François Laburthe

Using Constraints for Exploring Catalogs .................................. 883
  François Laburthe and Yves Caseau

Intermediate (Learned) Consistencies ......................................... 889
  Arnaud Lallouet, Andréi Legtchenko, Thi-Bich-Hanh Dao,
  and AbdelAli Ed-Dbali

Semi-independent Partitioning:
A Method for Bounding the Solution to COP’s .......................... 894
  David Larkin

Boosting as a Metaphor for Algorithm Design ............................. 899
  Kevin Leyton-Brown, Eugene Nudelman, Galen Andrew,
  Jim McFadden, and Yoav Shoham

An Efficient Filtering Algorithm for Disjunction of Constraints ...... 904
  Olivier Lhomme

INCOP: An Open Library for INcomplete Combinatorial OPtimization . 909
  Bertrand Neveu and Gilles Trombettoni

A Composition Algorithm for Very Hard Graph 3-Colorability Instances . 914
  Seiichi Nishihara, Kazunori Mizuno, and Kohsuke Nishihara

Efficient Representation of Discrete Sets for Constraint Programming . . 920
  Shuji Ohnishi, Hiroaki Tasaka, and Naoyuki Tamura

Applying Interchangeability Techniques
to the Distributed Breakout Algorithm ...................................... 925
  Adrian Petcu and Boi Faltings

Symmetry Breaking in Graceful Graphs ........................................ 930
  Karen E. Petrie and Barbara M. Smith

Tree Local Search ......................................................................... 935
  Nicolas Prcovic

A SAT-Based Approach to Multiple Sequence Alignment ................ 940
  Steven Prestwich, Des Higgins, and Orla O’Sullivan

Maintaining Dominance Consistency .......................................... 945
  Igor Razgon and Amnon Meisels

Terminating Decision Algorithms Optimally ................................. 950
  Tuomas Sandholm
Scene Reconstruction Based on Constraints: Details on the Equation System Decomposition .................. 956  
Gilles Trombettoni and Marta Wilczkowiak

Doctoral Abstracts

A New Approach to Solving SAT-Encoded Binary CSPs .......... 962  
Carlos Ansótegui

FeReRA: A Multi-agent Approach to Constraint Satisfaction ........ 963  
Muhammed Basharu

Semantic Decomposition for Solving Distance Constraints .......... 964  
Heikel Batnini and Michel Rueher

Using Constraint Programming and Simulation for Execution Monitoring and On-Line Rescheduling with Uncertainty ...................... 966  
Julien Bidot

On the Enhancement of the Informed Backtracking Algorithm .......... 967  
Jlifi Boutheina and Khaled Ghédira

Extending CLP with Metaheuristics ...................................... 968  
Ole Boysen

Self Configuring Constraint Programming Systems ...................... 969  
Tom Carchrae

Interactive Tradeoff Generation .......................................... 970  
Moyra Duggan, Barry O’Sullivan, and Eugene C. Freuder

Introducing esra, a Relational Language for Modelling Combinatorial Problems .................................. 971  
Pierre Flener, Justin Pearson, and Magnus Ågren

Abstracting Constraints Using Constraints ............................... 972  
James Gibbons

Sensitivity Analysis in CSPs ............................................. 973  
Diarmuid Glynn

Solution Stability in Constraint Satisfaction Problems .................. 974  
Emmanuel Hebrard

distn: An Euclidean Distance Global Constraint ....................... 975  
Michael Heusch

Algorithmic Mechanism Design and Constraints ........................... 976  
Alan Holland and Barry O’Sullivan
Preference Constraints: New Global Soft Constraints Dedicated
to Preference Binary Relations ........................................... 977
  Rémy-Robert Joseph, Peter Chan, Michael Hiroux, and Georges Weil

Optimising the Representation and Evaluation
of Semiring Combination Constraints .................................. 978
  Jerome Kelleher and Barry O’Sullivan

Symmetry Breaking Ordering Constraints ............................. 979
  Zeynep Kiziltan

Observation of Constraint Programs ..................................... 980
  Ludovic Langevine

Search Programming .......................................................... 981
  Wojciech Legierski

Exploiting Microstructure in CSPs ....................................... 982
  Chavalit Likitvivatanavong

Using Case-Based Reasoning to Write Constraint Programs .......... 983
  James Little, Cormac Gebruers, Derek Bridge, and Eugene C. Freuder

Reformulation Techniques for a Class of Permutation Problems ...... 984
  Toni Mancini

NuSBDS: An Easy to Use Symmetry Breaking System ................... 985
  Iain McDonald

Interactivity in Constraint Programming ................................ 986
  Tomáš Müller

Identifying Inconsistent CSPs by Relaxation ............................ 987
  Tomas Nordlander, Ken Brown, and Derek Sleeman

Useful Explanations .......................................................... 988
  Barry O’Callaghan, Eugene C. Freuder, and Barry O’Sullivan

Teacher and Learner Profiles for Constraint Acquisition ............ 989
  Sarah O’Connell, Barry O’Sullivan, and Eugene C. Freuder

Comparison of Symmetry Breaking Methods ............................ 990
  Karen E. Petrie

Improved Branch and Bound Algorithms for Max-2-SAT
and Weighted Max-2-SAT .................................................... 991
  Jordi Planes

Search for Mathematical Objects .......................................... 992
  Colin Quirke
Explanations for Global Constraints ................................................. 993
   Guillaume Rochart

Watching Clauses in Quantified Boolean Formulae ................................. 994
   Andrew G.D. Rowley

Distributed Constraint-Based Railway Simulation ................................. 995
   Hans Schlenker

Dynamic Step Size Adjustment in Iterative Deepening Search .................... 996
   Daniel Sheridan

Learning Good Variable Orderings ...................................................... 997
   Paula Sturdy

An Adaptive Controller for Real-Time Resolution
   of the Vehicle Routing Problem ......................................................... 998
   Ann Tighe, Finlay Smith, and Gerard Lyons

α-Dynamic Controllability of Simple Temporal Problems
   with Preferences and Uncertainty ......................................................... 999
   Kristen Brent Venable

Computing Explanations for Global Scheduling Constraints ......................... 1000
   Petr Vilím

Restart Strategies: Analysis and Simulation ............................................ 1001
   Huayue Wu and Peter van Beek

OpenSolver: A Coordination-Enabled Abstract Branch-and-Prune
   Tree Search Engine .............................................................................. 1002
   Peter Zoeteweij

Author Index .......................................................................................... 1003
