# Table of Contents

Specification and Verification of a Formal System for Structurally Recursive Functions .......................... 1
   *Andreas Abel*

A Predicative Strong Normalisation Proof for a $\lambda$-Calculus with Interleaving Inductive Types ...................... 21
   *Andreas Abel and Thorsten Altenkirch*

Polymorphic Intersection Type Assignment for Rewrite Systems with Abstraction and $\beta$-Rule ..................... 41
   *Steffen van Bakel, Franco Barbanera, and Maribel Fernández*

Computer-Assisted Mathematics at Work (The Hahn-Banach Theorem in Isabelle/Isar) .................................. 61
   *Gertrud Bauer and Markus Wenzel*

Specification of a Smart Card Operating System ......................... 77
   *Gustavo Betarte, Cristina Cornes, Nora Szasz, and Alvaro Tasistro*

Implementation Techniques for Inductive Types in Plastic ............... 94
   *Paul Callaghan and Zhaohui Luo*

A Co-inductive Approach to Real Numbers .......................... 114
   *Alberto Caiaffoglione and Pietro Di Gianantonio*

Information Retrieval in a Coq Proof Library Using Type Isomorphisms .......... 131
   *David Delahaye*

Memory Management: An Abstract Formulation of Incremental Tracing .......... 148
   *Healfdene Goguen, Richard Brooksby, and Rod Burstall*

The Three Gap Theorem (Steinhaus Conjecture) ................... 162
   *Micaela Mayero*

Formalising Formulas-as-Types-as-Objects .......................... 174
   *Qiao Haiyan*

**Author Index** ........................................................................ 195
