Computational Science - ICCS 2001

Bearbeitet von
Vassil N Alexandrov, Jack J Dongarra, Benjoe A Juliano, Rene S Renner, C.J.Kenneth Tan

ISBN 978 3 540 42233 4
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1523 g

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.
# Table of Contents, Part II

## Digital Imaging Applications

Densification of Digital Terrain Elevations Using Shape from Shading with Single Satellite Imagery .................................................. 3
  *Mohammad A. Rajabi, J.A. Rod Blais*

PC-Based System for Calibration, Reconstruction, Processing, and Visualization of 3D Ultrasound Data Based on a Magnetic-Field Position and Orientation Sensing System ........................................ 13
  *Emad Boctor, A. Saad, Dar-Jen Chang, K. Kamel, A.M. Youssef*

Automatic Real-Time XRII Local Distortion Correction Method for Digital Linear Tomography ...................................................... 23
  *Christian Forlani, Giancarlo Ferrigno*

Meeting the Computational Demands of Nuclear Medical Imaging Using Commodity Clusters .......................................................... 27
  *Wolfgang Karl, Martin Schulz, Martin Völk, Sibylle Ziegler*

An Image Registration Algorithm Based on Cylindrical Prototype Model ................................................................. 37
  *Joong-Jae Lee, Gye-Young Kim, Hyung-II Choi*

An Area-Based Stereo Matching Using Adaptive Search Range and Window Size .............................................................. 44
  *Han-Suh Koo, Chang-Sung Jeong*

## Environmental Modeling

Methods of Sensitivity Theory and Inverse Modeling for Estimation of Source Term and Risk/Vulnerability Areas ......................... 57
  *Vladimir Penenko, Alexander Baklanov*

The Simulation of Photochemical Smog Episodes in Hungary and Central Europe Using Adaptive Gridding Models ....................... 67
  *István Lagzi, Alison S. Tomlin, Tamás Turányi, László Haszpra, Róbert Mészáros, Martin Berzins*

Numerical Solution of the Aerosol Condensation/Evaporation Equation .............................................................. 77
  *Khoi Nguyen, Donald Dabdub*

Efficient Treatment of Large-Scale Air Pollution Models on Supercomputers .......................................................... 82
  *Zahari Zlatev*

## High Performance Computational Tools and Environments

Pattern Search Methods for Use-Provided Points ........................................ 95
  *Pedro Alberto, Fernando Nogueira, Humberto Rocha, Luís N. Vicente*

In-situ Bioremediation: Advantages of Parallel Computing and Graphical Investigating Techniques ........................................ 99
  *M.C. Baracca, G. Clai, P. Ornelli*

Applying Evolutionary Algorithms to Combinatorial
Optimization Problems .............................................. 689
   Enrique Alba Torres, Sami Khuri
**Program and Visualization**

Exploratory Study of Scientific Visualization Techniques for Program Visualization ........................................ 701

Brian J. d'Auriol, Claudia V. Casas, Pramod K. Chikkappaiah,
L. Susan Draper, Ammar J. Esper, Jorge López, Rajesh Molakaseema,
Seetharami R. Seelam, René Saenz, Qian Wen, Zhengjing Yang

Immersive Visualization Using AVS/Express ........................................ 711

Ian Curington

VisBench: A Framework for Remote Data Visualization and Analysis .. 718

Randy W. Heiland, M. Pauline Baker, Danesh K. Tafti

The Problem of Time Scales in Computer Visualization ..................... 728

Mark Burgin, Damon Liu, Walter Karplus

Making Movies: Watching Software Evolve through Visualisation .......... 738

James Westland Chain, Rachel J. McCrindle

**Tools and Environments for Parallel and Distributed Programming**

Performance Optimization for Large Scale Computing: The Scalable
VAMPIR Approach ................................................................. 751

Holger Brunst, Manuela Winkler, Wolfgang E. Nagel,
Hans-Christian Hoppe

TRaDe: Data Race Detection for Java ........................................ 761

Mark Christiaens, Koen De Bosschere

Automation of Data Traffic Control on DSM Architectures ................... 771

Michael Frumkin, Haoqiang Jin, Jerry Yan

The Monitoring and Steering Environment ..................................... 781

Christian Glasner, Roland Hügl, Bernhard Reitinger,
Dieter Kranzlmüller, Jens Volkert

Token Finding Using Mobile Agents ........................................ 791

Delbert Hart, Mihail E. Tudoreanu, Eileen Kraemer

Load Balancing for the Electronic Structure Program GREMLIN in a Very
Heterogenous SSH-Connected WAN-Cluster of UNIX-Type Hosts .......... 801

Siegfried Höfinger

DeWiz - Modular Debugging for Supercomputers and
Computational Grids ............................................................. 811

Dieter Kranzlmüller

Fiddle: A Flexible Distributed Debugger Architecture ....................... 821

João Lourenço, José C. Cunha

Visualization of Distributed Applications for Performance Debugging .. 831

F.-G. Ottogalli, C. Labbé, V. Olive, B. de Oliveira Stein,
J. Chassin de Kergommeaux, J.-M. Vincent
Achieving Performance Portability with SKaMPI for High-Performance MPI Programs ........................................ 841
Ralf Reussner, Gunnar Hunzelmann

Cyclic Debugging Using Execution Replay ............................. 851
Michiel Ronsse, Mark Christiaens, Koen De Boschere

Visualizing the Memory Access Behavior of Shared Memory Applications on NUMA Architectures ........................................ 861
Jie Tao, Wolfgang Karl, Martin Schulz

CUMULVS Viewers for the ImmersaDesk .................................. 871
Torsten Wilde, James A. Kohl, Raymond E. Flanery

Simulation
N-Body Simulation on Hybrid Architectures .......................... 883
P.M.A. Sloot, P.F. Spinnato, G.D. van Albada

Quantum Mechanical Simulation of Vibration-Torsion-Rotation Levels of Methanol .................................................. 893
Yun-Bo Duan, Anne B. McCoy

Simulation-Visualization Complexes as Generic Exploration Environment ........................................ 903
Elena V. Zudilova

Efficient Random Process Generation for Reliable Simulation of Complex Systems .................................................. 912
Alexey S. Rodionov, Hyunseung Choo, Hee Y. Youn, Tai M. Chung, Kiheon Park

Replicators & Complementarity: Solving the Simplest Complex System without Simulation .......................... 922
Anil Menon

Soft Computing: Systems and Applications
More Autonomous Hybrid Models in Bang\(^2\) ............................ 935
Roman Neruda, Pavel Krušina, Zuzana Petrová

Model Generation of Neural Network Ensembles Using Two-Level Cross-Validation ........................................ 943
S. Vasupongayya, R.S. Renner, B.A. Juliano

A Comparison of Neural Networks and Classical Discriminant Analysis in Predicting Students’ Mathematics Placement Examination Scores ........................................ 952
Stephen J. Sheel, Deborah Vrooman, R.S. Renner, Shanda K. Dawsey

Neural Belief Propagation without Multiplication ..................... 958
Michael J. Barber

Fuzzy Logic Basis in High Performance Decision Support Systems ........................................ 965
A. Bogdanov, A. Degtyarev, Y. Nechaev

Scaling of Knowledge in Random Conceptual Networks ............. 976
Lora J. Durak, Alfred W. Hübler
# Table of Contents

Implementation of Kolmogorov Learning Algorithm for Feedforward Neural Networks ................................................................. 986  
*Roman Neruda, Arnošt Štědrý, Jitka Drkůšová*

Noise-Induced Signal Enhancement in Heterogeneous Neural Networks .............................................................. 996  
*Michael J. Barber, Babette K. Dellen*

**Phylogenetic Inference for Genome Rearrangement Data**  
Evolutionary Puzzles: An Introduction to Genome Rearrangement ............ 1003  
*Mathieu Blanchette*

High-Performance Algorithmic Engineering for Computational Phylogenetics ................................................................. 1012  
*Bernard M.E. Moret, David A. Bader, Tandy Warnow*

Phylogenetic Inference from Mitochondrial Genome Arrangement Data ........ 1022  
*Donald L. Simon, Bret Larget*

**Late Submissions**  
Genetic Programming: A Review of Some Concerns ................................. 1031  
*Maumita Bhattacharya, Baikunth Nath*

Numerical Simulation of Quantum Distributions: Instability and Quantum Chaos ........................................................................ 1041  
*G.Y. Kryuchkyan, H.H. Adamyan, S.B. Manvelyan*

Identification of MIMO Systems by Input-Output Takagi-Sugeno Fuzzy Models ................................................................. 1050  
*Nirmal Singh, Renu Vig, J.K. Sharma*

Control of Black Carbon, the Most Effective Means of Slowing Global Warming ................................................................. 1060  
*Mark Z. Jacobson*

Comparison of Two Schemes for the Redistribution of Moments for Modal Aerosol Model Application ........................................ 1061  
*U. Shankar, A.L. Trayanov*

A Scale-Dependent Dynamic Model for Scalar Transport in the Atmospheric Boundary Layer ........................................ 1062  
*Fernando Port-Agel, Qiao Qin*

**Advances in Molecular Algorithms**  
MDT - The Molecular Dynamics Test Set ................................................. 1065  
*Eric Barth*

Numerical Methods for the Approximation of Path Integrals Arising in Quantum Statistical Mechanics ........................................ 1066  
*Steve D. Bond*

The Multigrid N-Body Solver ................................................................. 1067  
*David J. Hardy*
Do Your Hard-Spheres Have Tails? A Molecular Dynamics Integration Algorithm for Systems with Mixed Hard-Core/Continuous Potentials . . . . . . 1068
  Brian B. Laird
An Improved Dynamical Formulation for Constant Temperature and Pressure Dynamics, with Application to Particle Fluid Models . . . . . . 1069
  Benedict J. Leimkuhler

**Author Index** .......................................................... 1071
