# Table of Contents

## Reflection and SOC in Java

JAC: A Flexible Solution for Aspect-Oriented Programming in Java .......................... 1  
*Renaud Pawlak (CNAM), Lionel Seinturier (Univ. Paris 6), Laurence Duchien, Gérard Florin (CNAM)*

Reflex – Towards an Open Reflective Extension of Java ............................... 25  
*Éric Tanter (University of Chile), Noury M.N. Bouraïd-Saïdani, Jacques Noyé (École des Mines de Nantes)*

System Checkpointing Using Reflection and Program Analysis ....................... 44  
*John Whaley (Stanford University)*

## Software Adaptation Using Reflection and SOC Techniques

Experiments with JavaPod, a Platform Designed for the Adaptation of Non-functional Properties ............................................. 52  
*Éric Bruneton (INRIA), Michel Riveill (ESSI)*

DJ: Dynamic Adaptive Programming in Java ........................................... 73  
*Doug Orleans, Karl Lieberherr (Northeastern University)*

The K-Component Architecture Meta-Model for Self-Adaptive Software .................. 81  
*Jim Dowling, Vinny Cahill (Trinity College Dublin)*

## Reflective Middleware for Distributed Mobile Applications

Separation of Concerns in Mobile Agent Applications .................................... 89  
*Naojasa Ubayashi (Toshiba), Tetsuo Tamai (University of Tokyo)*

Dynamic Adaptability: The Molène Experiment ..................................... 110  
*Jacques Malenfant (IRISA and Université de Bretagne sud), Maria-Teresa Segarra, Françoise André (IRISA)*

A Simple Security-Aware MOP for Java ........................................ 118  
*Denis Caromel, Fabrice Huet, Julien Vayssière (INRIA)*

Reflective Middleware Solutions for Context-Aware Applications .................... 126  
*Licia Capra, Wolfgang Emmerich, Cecilia Mascolo (University College London)*
# Table of Contents

## Testing and Verification of Reflective and SOC Systems

Testing MetaObject Protocols Generated by Open Compilers for Safety-Critical Systems ........................................ 134  
*Juan Carlos Ruiz, Jean-Charles Fabre, Pascale Thévenod-Fosse (LAAS-CNRS)*

Supporting Formal Verification of Crosscutting Concerns .......... 153  
*Torsten Nelson, Donald Cowan, Paulo Alencar (University of Waterloo)*

## Foundations of Reflection and Separations of Concerns

A Formal Definition of Crosscuts ........................................ 170  
*Rémi Douence, Olivier Motelet, Mario Südholt (École des Mines de Nantes)*

Process-Algebraic Foundations of Aspect-Oriented Programming ........ 187  
*James H. Andrews (University of Western Ontario)*

UML Reflections .......................................................... 210  
*François Pennanen, Jean-Marc Jézéquel, Jacques Malenfant, Gerson Sunyé (IRISA)*

## Software Methodologies for Separation of Concerns

A Hybrid Approach to Separation of Concerns: The Story of SADES ........ 231  
*Awaïs Rashid (Lancaster University)*

Coping with Crosscutting Software Changes  
Using Information Transparency ........................................ 250  
*William G. Griswold (University of California, San Diego)*

## Poster Session

Template Metaprogramming an Object Interface to Relational Tables .... 266  
*Giuseppe Attardi, Antonio Cisternino (Università di Pisa)*

Performance and Integrity in the OpenORB Reflective Middleware ........ 268  
*Gordon S. Blair (University of Tromsø & Lancaster University), Geoff Coulson, Michael Clarke, Nikos Parlavantzas (Lancaster University)*

Data Abstraction in AspectJ ........................................... 270  
*Stephan Gudmundson, Gregor Kiczales (University of British Columbia)*

Towards Coping with Role-Binding Anomaly .......................... 272  
*Joon-Sang Lee, Doo-Hwan Bae (Korea Advanced Institute of Science and Technology), Ikju Han (Korea Polytechnic University)*
Removing Reflection from Java Programs Using Partial Evaluation........274
Jung Gyu Park (Korea University), Arthur H. Lee (University of Utah)

Open Implementation of UML Meta-model(s) .............................276
Pascal Rapicault (University of Nice Sophia Antipolis and CNRS &
Object Technology International), Jean-Paul Rigault (University of Nice
Sophia Antipolis and CNRS & INRIA)

JavaCloak: Reflecting on Java Typing for Class Reuse Using Proxies....278
Karen Renaud (University of South Africa), Huw Evans (University
of Glasgow)

Aspects of Exceptions at the Meta-level......................................280
Ian Welch, Robert J. Stroud, Alexander Romanovsky (University
of Newcastle upon Tyne)

Author Index.................................................................283
