# Table of Contents

Team Formation by Self-Interested Mobile Agents .......................... 1  
*Stanislaw Ambroszkiewicz, Olaf Matyja, and Wojciech Penczek, Poland*

Conception, Behavioral Semantics and Formal Specification of Multi-Agent Systems .......................... 16  
*Walid Chainbi, Mohamed Jmaiel, and Ben Hamadou Abdelmajid, Tunisia*

Learning Message-Related Coordination Control in Multiagent Systems .......................... 29  
*Toshiharu Sugawara and Satoshi Kurihara, Japan*

Multi-Agent Reinforcement Learning System Integrating Exploitation and Exploration-Oriented Learning .......................... 45  
*Satoshi Kurihara, Rikio Onai, and Toshiharu Sugawara, Japan*

Motivated Behavior for Goal Adoption .......................... 58  
*Michael Luck and Mark d’Inverno, U.K.*

Physically Based, Self-Organizing Cellular Automata .......................... 74  
*Alan Dorin, Australia*

Service Contract Negotiation - Agent-Based Support for Open Service Environments .......................... 88  
*Annika Waern, Sweden*

An Awareness-Based Model for Agents Involved in Reporting Activities .......................... 105  
*Bernard Moulin, Canada*

**GISM**: A Language for Modelling and Developing Agent-Based Intelligent Systems .......................... 122  
*Hongxue Wang and John Slaney, Australia*

Programming Internet Based DAI Applications in Qu-Prolog .......................... 137  
*Keith Clark, Peter J. Robinson, and Richard Hagen, Australia*

Design of an Agent-Based, Multi-user Scheduling Implementation .......................... 152  
*Andrew Scott, Karen Jenkin, and Rye Senjen, Australia*

A Team of Agents Cooperating for Intelligent Tutoring .......................... 166  
*Ruddy Lelouche, Canada*

Secure Information Gathering Agent for Internet Trading .......................... 183  
*X.F. Wang, X. Yi, K.Y. Lam, and E. Okamoto, Singapore and Japan*

**Author Index** .......................... 195
