## Contents

Real-Time and Active Databases: A Survey  
*J. Eriksson* ................................................................. 1

### Invited Talks

Design of a Real-Time SQL Engine in the Distributed Environment  
*D. Chen and A.K. Mok* ................................................. 27

A Cellular Database System for the 21st Century  
*M.L. Kersten* .............................................................. 39

BeeHive: Global Multimedia Database Support for Dependable, Real-Time Applications  
*J.A. Stankovic, S.H. Son, and J. Liebeherr* ...................... 51

### Paper Presentations

An Active Real-Time Database Model for Air Traffic Control Systems  
*K.-J. Lin, C.-S. Peng, and T. Ng* ..................................... 73

Performance Issues in Processing Active Real-Time Transactions  
*Ö. Ulusoy* ................................................................. 98

Scheduling of Triggered Transactions in Distributed Real-Time Active Databases  
*K.-y. Lam, G.C.K. Law, and V.C.S. Lee* ......................... 119

Buffer Management in Active, Real-Time Database Systems: Concepts and An Algorithm  
*I.R. Viguier and A. Datta* ............................................ 141

Parallel Event Detection in Active Database Systems: The Heart of the Matter  
*U. Jaeger and J.K. Obermaier* ..................................... 159

Toward Duration-Based, Constrained and Dynamic Event Types  
*C.L. Roncancio* .......................................................... 176

Supporting System-Level Testing of Applications by Active Real-Time Database Systems  
*J. Mellin* ................................................................. 194

Temporal Indeterminacy in Deductive Databases: An Approach Based on Event Calculus  
*L. Chittaro and C. Combi* ............................................ 212
Panel Sessions

Predictability in Active Real-Time/Temporal Databases
Chair: A.K. Mok ................................................................. 231

Practical and Industrial Experience in Active Real-Time Databases
Chair: J.A. Stankovic .......................................................... 238

Author Index .................................................................................. 245
