Automated Deduction - CADE-16

16th International Conference on Automated Deduction, Trento, Italy, July 7-10, 1999, Proceedings

von
Harald Ganzinger

1. Auflage

Springer-Verlag Berlin Heidelberg 1999

Verlag C.H. Beck im Internet:

# Table of Contents

## Session 1

A Dynamic Programming Approach to Categorial Deduction  
*Philippe de Groote*  

Tractable Transformations from Modal Provability Logics into First-Order Logic  
*Stéphane Demri and Rajeev Goré*

## Session 2

Invited Talk: Decision Procedures for Guarded Logics  
*Erich Grädel*

A PSpace Algorithm for Graded Modal Logic  
*Stephan Tobies*

## Session 3

Solvability of Context Equations with Two Context Variables Is Decidable  
*Manfred Schmidt-Schauß and Klaus U. Schulz*

Complexity of the Higher Order Matching  
*Tomasz Wierzbicki*

Solving Equational Problems Efficiently  
*Reinhard Pichler*

## Session 4

VSDITLU: A Verifiable Symbolic Definite Integral Table Look-Up  
*A. A. Adams, H. Gottliebsen, S. A. Linton, and U. Martin*

A Framework for the Flexible Integration of a Class of Decision Procedures into Theorem Provers  
*Predrag Janičić, Alan Bundy, and Ian Green*

Presenting Proofs in a Human-Oriented Way  
*Helmut Horacek*

## Session 5

On the Universal Theory of Varieties of Distributive Lattices with Operators: Some Decidability and Complexity Results  
*Viorica Sofronie-Stokkermans*
Maslov’s Class K Revisited .................................................. 172
    \textit{Ulrich Hustadt and Renate A. Schmidt}

Prefix Resolution: A Resolution Method for Modal and Description Logics .................................................. 187
    \textit{Carlos Areces, Hans de Nivelle, and Maarten de Rijke}

**Session 6: System Descriptions**

System Description: Twelf — A Meta-Logical Framework for Deductive Systems .................................................. 202
    \textit{Frank Pfenning and Carsten Schürmann}

System Description: \texttt{inka 5.0} - A Logic Voyager ......................... 207
    \textit{Serge Autexier, Dieter Hutter, Heiko Mantel, and Axel Schäirer}

System Description: \texttt{CutRes 0.1}: Cut Elimination by Resolution ........ 212
    \textit{Matthias Baaz, Alexander Leitsch, and Georg Moser}

System Description: MathWeb, an Agent-Based Communication Layer for Distributed Automated Theorem Proving .................. 217
    \textit{Andreas Franke and Michael Kohlhase}

System Description: Using OBDD’s for the Validation of Skolem Verification Conditions .................................................. 222
    \textit{E. Pascal Gribomont and Nachaat Salloum}

Fault-Tolerant Distributed Theorem Proving .......................... 227
    \textit{Jason Hickey}

System Description: Waldmeister – Improvements in Performance and Ease of Use .................................................. 232
    \textit{Thomas Hillenbrand, Andreas Jaeger, and Bernd Löchner}

**Session 7**

Formal Metatheory Using Implicit Syntax, and an Application to Data Abstraction for Asynchronous Systems .................. 237
    \textit{Amy P. Felty, Douglas J. Howe, and Abhik Roychoudhury}

A Formalization of Static Analyses in System \textit{F} .................... 252
    \textit{Frédéric Prost}

On Explicit Reflection in Theorem Proving and Formal Verification ...... 267
    \textit{Sergei N. Artemov}
Session 8: System Descriptions

System Description: Kimba, A Model Generator for Many-Valued First-Order Logics ................................. 282
  Karsten Konrad and D. A. Wolfram

System Description: Teyjus—A Compiler and Abstract Machine Based Implementation of λProlog ..................... 287
  Gopalan Nadathur and Dustin J. Mitchell

Vampire ................................................................. 292
  Alexandre Riazanov and Andrei Voronkov

System Abstract: E 0.3 .................................................. 297
  Stephan Schulz

Session 9

Invited Talk: Rewrite-Based Deduction and Symbolic Constraints ........ 302
  Robert Nieuwenhuis

Towards an Automatic Analysis of Security Protocols in First-Order Logic 314
  Christoph Weidenbach

Session 10

A Confluent Connection Calculus ..................................... 329
  Peter Baumgartner, Norbert Eisinger, and Ulrich Furbach

Abstraction-Based Relevancy Testing for Model Elimination................. 344
  Marc Fuchs and Dirk Fuchs

A Breadth-First Strategy for Mating Search ............................. 359
  Matthew Bishop

Session 11: System Competitions

The Design of the CADE-16 Inductive Theorem Prover Contest ............ 374
  Dieter Hutter and Alan Bundy

Session 12: System Descriptions

System Description: SPASS Version 1.0.0 ................................ 378
  Christoph Weidenbach, Bijan Afshordel, Uwe Brahm, Christian Cohrs,
  Thorsten Engel, Enno Keen, Christian Theobalt, and Dalibor Topić

KM: A Theorem Prover for K .......................................... 383
  Andrei Voronkov
System Description: CYNTHIA ................................. 388
Jon Whittle, Alan Bundy, Richard Boulton, and Helen Lowe

Session 13

Invited Talk: Embedding Programming Languages in Theorem Provers ... 398
Tobias Nipkow

Extensional Higher-Order Paramodulation and RUE-Resolution ........... 399
Christoph Benzmüller

Automatic Generation of Proof Search Strategies for Second-Order Logic . 414
Raul H. C. Lopes

Author Index .................................................. 429
