Computer Science Logic

13th International Workshop, CSL'99, 8th Annual Conference of the EACSL, Madrid, Spain, September 20-25, 1999, Proceedings

Bearbeitet von
Jörg Flum, Mario Rodriguez-Artalejo

1. Auflage 1999. Taschenbuch. xii, 588 S. Paperback
ISBN 978 3 540 66536 6
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1830 g

Weitere Fachgebiete > Mathematik > Mathematik Allgemein > Grundlagen der Mathematik
Zu Leseprobe

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.
# Table of Contents

## Invited Papers

Topological Queries in Spatial Databases  
*V. Vianu* ................................................................. 1  
The Consistency Dimension, Compactness, and Query Learning  
*J.L. Balcázar* ........................................................... 2  
Descriptive and Parameterized Complexity  
*M. Grohe* ................................................................. 14  
Logical Specification of Operational Semantics  
*P.D. Mosses* .............................................................. 32  
Constraint-Based Analysis of Broadcast Protocols  
*G. Delzanno, J. Esparza and A. Podelski* ........................... 50

## Contributed Papers

### Descriptive Complexity, I

Descriptive Complexity Theory for Constraint Databases  
*E. Grädel and S. Kreutzer* ........................................... 67  
Applicative Control and Computational Complexity  
*D. Leivant* ............................................................... 82

### Verification

Applying Rewriting Techniques to the Verification of Erlang Processes  
*T. Arts and J. Giesl* .................................................... 96  
Difference Decision Diagrams  
*J. Møller, J. Lichtenberg, H.R. Andersen and H. Hulgaard* .......... 111  
Analysis of Hybrid Systems: An Ounce of Realism Can Save an Infinity of States  
*M. Fränzle* ............................................................... 126  
Verifying Liveness by Augmented Abstraction  
*Y. Kesten and A. Pnueli* ............................................. 141

### Temporal Logic

Signed Interval Logic  
*T.M. Rasmussen* .......................................................... 157  
Quantitative Temporal Logic  
*Y. Hirshfeld and A. Rabinovich* ...................................... 172  
An Expressively Complete Temporal Logic without Past Tense Operators for Mazurkiewicz Traces  
*V. Diekert and P. Gastin* .............................................. 188
Lambda Calculus, Linear Logic

Using Fields and Explicit Substitutions to Implement Objects and Functions in a de Bruijn Setting
E. Bonelli ............................................................... 204
Closed Reductions in the λ-Calculus
M. Fernández and I. Mackie ............................................. 220
Kripke Resource Models of a Dependently-Typed, Bunched λ-Calculus
S. Ishtiaq and D.J. Pym .................................................. 235
A Linear Logical View of Linear Type Isomorphisms
V. Balat and R. Di Cosmo ................................................. 250

Logic Programming, Modal Logic, Description Logic

Choice Logic Programs and Nash Equilibria in Strategic Games
M. De Vos and D. Vermeir .............................................. 266
Resolution Method for Modal Logic with Well-Founded Frames
S. Hagihara and N. Yonezaki ............................................ 277
A NExpTime-Complete Description Logic Strictly Contained in C²
S. Tobies ................................................................. 292
A Road-Map on Complexity for Hybrid Logics
C. Areces, P. Blackburn and M. Marx .................................. 307

Descriptive Complexity, II

MonadicNLIN and Quantifier-Free Reductions
C. Lautemann and B. Weinzinger ........................................ 322
Directed Reachability: From Ajtai-Fagin to Ehrenfeucht-Fraïssé Games
J. Marcinkowski ............................................................ 338
Fixpoint Alternation and the Game Quantifier
J.C. Bradfield ............................................................ 350

Logic and Complexity

Lower Bounds for Space in Resolution
J. Torán ................................................................. 362
Program Schemes, Arrays, Lindström Quantifiers and Zero-One Laws
I.A. Stewart ............................................................... 374
Open Least Element Principle and Bounded Query Computation
L.D. Bekemishev ......................................................... 389

Lambda Calculus, Type Theory

A Universal Innocent Game Model for the Böhm Tree Lambda Theory
A.D. Ker, H. Nickau and C.-H.L. Ong .................................. 405
Anti-Symmetry of Higher-Order Subtyping
A. Compagnoni and H. Goguen ........................................... 420
