Correct System Design

Recent Insights and Advances

Bearbeitet von
Ernst-Rüdiger Olderog, Bernhard Steffen

ISBN 978 3 540 66624 0
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1350 g

Weitere Fachgebiete > EDV, Informatik > Programmiersprachen: Methoden > Prozedurorientierte Programmierung

DIE FACHBUCHHANDLUNG
# Table of Contents

## I Methodology

Theories of Programming: Top-Down and Bottom-Up and Meeting in the Middle .......................................................... 3  
*C.A.R. Hoare*

A Triptych Software Development Paradigm: Domain, Requirements and Software .......................................................... 29  
*D. Bjørner*

Real-Time Constraints Through the ProCoS Layers ......................... 61  
*A.P. Ravn, H. Rischel*

Monotonicity in Calculational Proofs ........................................ 79  
*D. Gries*

## II Programming

The Alma Project, or How First-Order Logic Can Help Us in Imperative Programming .......................................................... 89  
*K.R. Apt, A. Schaerf*

Type and Effect Systems .......................................................... 114  
*F. Nielson, H.R. Nielson*

## III Automation

Proving Theorems About Java-Like Byte Code ............................ 139  
*J S. Moore*

Multiple State and Single State Tableaux for Combining Local and Global Model Checking .................................................. 163  
*A. Biere, E.M. Clarke, Y. Zhu*

On the Existence of Network Invariants for Verifying Parameterized Systems .......................................................... 180  
*P.A. Abdulla, B. Jonsson*
### IV Compilation

<table>
<thead>
<tr>
<th>Title</th>
