The effects of market structure on a heterogeneous evolving population of traders ........................................ 83

Dan Ladley and Seth Bullock

Analysis on Transport Networks of Railway, Subway and Waterbus in Japan ........................................ 99

Takahiro Majima, Mitujiro Katuhara and Keiki Takadama

Network Design via Flow Optimization ........................................ 115

Yasuke Matsumura, Hidenori Kawamura, Koichi Kurumatani, and Azuma Ohuchi

Gibbs measures for the network ........................................ 129

Syuji Miyazaki

Extracting Users’ Interests of Web-watching Behaviors Based on Site-Keyword Graph ................................. 139

Tsugoshi Murata and Kota Saito

Topological aspects of protein networks ........................................ 147

J.C. Nacher, M. Hayashida, and T. Akutsu

Collective Intelligence of Networked Agents ........................................ 159

Akira Namatame

Using an agent based simulation to evaluate scenarios in customers’ buying behaviour ........................................ 177

Filippo Neri

How to Form Stable and Robust Network Structure through Agent Learning — from the viewpoint of a resource sharing problem ........................................ 189

Itsuki Noda and Masayuki Ohta
An Evolutionary Rulebase Based Multi-agents System .......... 203
Hiroshi Ouchiyaama, Runhe Huang, and Jianhua Ma

Improvements in Performance of Large-Scale Multi-Agent Systems Based on the Adaptive/Non-Adaptive Agent Selection ................. 217
Toshihara Sugawara, Kenuske Fukuda, Toshio Hirotsu, Shin-ya Sato and Satoshi Kurihara

Effect of grouping on classroom communities ..................... 231
Toriumi Fujio and Ishii Kenichiro

Emergence and Evolution of Coalitions in Buyer-Seller Networks .......................................... 245
Frank E. Walter, Stefano Battiston, and Frank Schweitzer
