Contents

Introduction
Régis Gras, Einoshin Suzuki, Fabrice Guillet, Filippo Spagnolo ........... 1

Part I Methodology and concepts for SIA

An overview of the Statistical Implicative Analysis (SIA) development
Régis Gras, Pascale Kuntz .................................................. 11

CHIC:Cohesive Hierarchical Implicative Classification
Raphaël Couturier .......................................................... 41

Assessing the interestingness of temporal rules with Sequential Implication Intensity
Julien Blanchard, Fabrice Guillet, Régis Gras ......................... 55

Part II Application to concept learning in education, teaching, and didactics

Student’s Algebraic Knowledge Modelling: Algebraic Context as Cause of Student’s Actions
Marie-Caroline Croset, Jana Trgalova, Jean-François Nicaud .......... 75

The graphic illusion of high school students
Eduardo Lacasta, Miguel R. Wilhelmi................................. 99

Implicative networks of student’s representations of Physical Activities
Catherine-Marie Chiocca, Ingrid Verscheure ....................... 119
A comparison between the hierarchical clustering of variables, implicative statistical analysis and confirmatory factor analysis
Iliada Elia, Athanasios Gagatsis ........................................... 131

Implications between learning outcomes in elementary bayesian inference
Carmen Díaz, Inmaculada de la Fuente, Carmen Batanero .............. 163

Personal Geometrical Working Space: a Didactic and Statistical Approach
Alain Kuzniak ................................................................. 185

Part III A methodological answer in various application frameworks

Statistical Implicative Analysis of DNA microarrays
Gerard Ramstein ............................................................ 205

On the use of Implication Intensity for matching ontologies and textual taxonomies
Jérôme David, Fabrice Guillet, Henri Briand, Régis Gras ................. 227

Modelling by Statistic in Research of Mathematics Education
Elsa Malisani and Aldo Scimone and Filippo Spagnolo ................ 247

Didactics of Mathematics and Implicative Statistical Analysis
Dominique Lahanier-Reuter ................................................ 277

Using the Statistical Implicative Analysis for Elaborating Behavioral Referentials
Stéphane Daviet, Fabrice Guillet, Henri Briand, Serge Baquedano,
Vincent Philippé, Régis Gras .............................................. 299

Fictitious Pupils and Implicative Analysis: a Case Study
Pilar Orús, Pablo Gregori .................................................. 321

Identifying didactic and sociocultural obstacles
to conceptualization through Statistical Implicative Analysis
Nadja Maria Acloy-Régnier, Jean-Claude Régier ........................ 347

Part IV Extensions to rule interestingness in data mining

Pitfalls for Categorizations of Objective Interestingness
Measures for Rule Discovery
Einoshin Suzuki ............................................................ 383
